Introduction

The **McHale 991 High Speed** which you have purchased has been developed through years of constant research and development. Given proper care and attention the **991 High Speed** will give years of reliable and dependable performance. However it is important that the operators manual is read and fully understood to achieve this, **before** the machine is operated. As part of this philosophy it is vital to use only **genuine McHale** replacement parts, as these are manufactured to the same high standard as the original machine. These may be obtained through your **McHale** dealer.

If any part of this manual is not fully understood, please contact your **McHale** dealer who will be able to answer any questions or queries that you might have. It is important to quote the machine serial number when requiring spare parts or technical assistance. Space is provided below to record the machine details:

Serial number:	
Year of manufacture:	
Date of delivery:	

If you require further copies of this spare parts manual please
quote part number CLT00278

Note: Parts described as left and right are done so according to the direction that the machine normally travels in.

Note: Due to a policy of continuous product development and improvement *McHale Engineering* reserve the right to alter machine specifications without prior notice.

Remote control options (263)

Infrared Remote Control

Used on older versions of the 991/995/HS2000 (KST00007) and on the 998 (KST00022).

Radio Remote Control

Used on 998 from serial 252200 onwards (KST00098). Kit includes items 6-9.

Supersedes infrared remote control on 991/995 (KST00053) and HS2000 (KST00021). Kit includes items 6-12.
